

Volkswagen ID.4 EV charging

DC Fast Charging

5-80% in about 38 minutes.¹

Public charging.

CCS Connector

- The 2021 VW ID.4 includes 3 years of unlimited charging on the Electrify America DC Fast Charging network²
- The Volkswagen ID.4 EV's maximum charge rate is 125kW.

Level 2

About 7.5-11.5 hours to a full charge.³

Home & public charging.

J1772 Connector

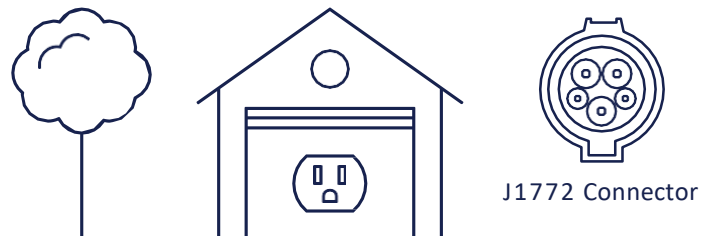

- Level 2 charging at home requires separate equipment purchase and installation, see www.electrifyhome.com for details.
- Most chargers found in public are Level 2 Chargers and typically require app or user accounts to charge.

Level 1

About 83 hours to a full charge.⁴

Home charging.

J1772 Connector

- Level 1 cable is included with the vehicle and can be found in the trunk.
- Can be plugged into a regular 120V GFI household outlet at home.

*Level 2 wallbox charger not included with vehicle purchase and may require extra installation and wiring costs.

**Hardwired chargers do not require an outlet. Consult a licensed and qualified electrician for more information. Proper installation required. Professional installation may be recommended.

1.ID.4 equipped with fast charging capability maximum rate of 125kW. Based on charging at a 125kW or higher charger. Charging times will vary and depend on a variety of factors, including ambient temperature, charger type, battery condition and initial state of charge, vehicle condition and others. Frequent and consecutive fast charging can permanently decrease battery capacity.

2.Available on MY21 ID.4 vehicles. 3 years of unlimited charging begins upon vehicle purchase. Non-transferable. Not available for commercial use, such as ridesharing. Requires Electrify America account, app, enrollment in ID.4 Charging Plan, and acceptance of Terms of Use. After user-initiated charge session stop or vehicle reaches full charge, and 10-min grace period, Idle Fees will apply and user is responsible. In the event of suspected fraud or abuse or other unforeseen events, Volkswagen of America may discontinue or modify the offer in its sole discretion.

3. Based on an 11kW Level 2 charger for 7.5 hours, and a 7.2kW Level 2 charger for 11.5 hours. Charging times will vary and depend on a variety of factors, including ambient temperature, charger type, battery condition and initial state of charge, vehicle condition and others.

4.Actual charge time will vary and depends on several factors including battery age and vehicle condition. Battery capacity decreases with time and use. See dealer or owner's literature for details.
